SUMMARY

I have a strong passion for programming, networking, and system operations. I enjoy understanding how technology works behind the scenes, especially the interaction between software, hardware, and networks, and how these components come together to create efficient and reliable systems. This curiosity drives me to explore beyond what is taught in class and to continuously improve my technical understanding. I prefer learning through hands-on practice, where I build small projects, test different approaches, and learn from both success and failure. Through this process, I have developed a habit of problem-solving, troubleshooting, and thinking critically when faced with technical challenges.

EDUCATION

2025-Present
UNIVERSITI TUN HUSSEIN ONN MALAYSIA (UTHM)

DIPLOMA IN INFORMATION TECHNOLOGY

Diploma in Information Technology
Current GCPA: 3.70(1st semester)

2020-2025
SMK TUN PERAK
MUAR, JOHOR

BUSSINESS AND SPORT SCIENCE STREAM

Experience and knowledge about bussiness and sport science skill
Be judging and sport management for related competition

SIJIL PEMBELAJARAN MALAYSIA (SPM)

3A 5B

LANGUAGE

MALAY

- Malay language as my native language
- since I'm born in Malaysia, with different ethnic, Malay is known as primary language in communication

ENGLISH

- English be my secondary language when communication
- it easier to comunicate with other who's don't expert in malay language,especially with person who has different bankground religion and culture

WORK EXPERIENCE AND PROJECT ASSIGNMENT

JULY 2026-FEB 2026
HIKINIKU KITCHEN

Barista

- Prepared a variety of beverages including espresso-based drinks, teas, and specialty items
- Ensured consistency in taste, quality, and presentation of all drinks

FEB 2025- AUG 2025
RICHIAMO COFEE SHOP

Barista

- Handled customer orders, payments, and inquiries in a professional manner
- Delivered friendly and efficient customer service in a fast-paced environment
- Maintained cleanliness and hygiene standards of the workspace

MUHAMMAD AMMAR FAKHRI BIN TAIB

Lot 3156, Jln Benteng, Bkt Treh, 84000 Muar, Johor

Project Assignment

- **Semester 1**

Networking

- Learned basic concepts of networking (IP addressing, protocols, topology)
- Configured simple networks using tools like Cisco Packet Tracer
- Understood how devices communicate within LAN and basic routing
- Explored TCP/IP model and data transmission process
- Developed troubleshooting skills for network connectivity issues
- Built own networking connectivity with cisco packet tracer base on project scenario, also built our own topology sorting method.

Operating System (OS)

- Studied core functions of OS (process management, memory management, file systems)
- Learned differences between OS types (Windows, Linux, Lubuntu,etc.)
- Practiced basic command-line operations (especially in Linux)
- Understood how OS manages hardware and software interaction
- Gained awareness of system security and user permissions
- Built self-learning and knowledge by management file or directory using different operating system

Algorithm Design

- Learned fundamental problem-solving techniques using algorithms
- Studied basic algorithms (searching, sorting like bubble sort, linear search)
- Practiced writing step-by-step logical solutions
- Improved computational thinking and efficiency awareness
- Introduced to time complexity (simple Big-O concepts)
- Practise and built flowchart
- by built flowchart into the real time system management flow
- flowchart partically learning how compiler work.

ADDITIONAL EXPERIENCE

Freelancer

- Experienced with affilianted business
- daily generate income: RM 50 - RM 100
- Senteora Affiliate Programme Platform ,Sg Digital Holdings Pye. Ltd.

Editor

- Experience in editing especially gaming video content
- generate my own money by editing customer content.

SKILLS

- Programming(C++)
- Problem-solving management
- Editing
- Algorithm Design Fundamentals
- Mathematical Analysis
- Design Infographic
- Cybersecurity Fundamentals
- Networking basic experience and knowledge
- UI/UX Design
- Computer Architecture understanding
